

GREEN HOOP TUNNEL (LENGTH) 2.9M

CONTENTS

4	GREEN FLEXIBLE HOOP
8	FLEXIBLE ANCHORS

ASSEMBLY PROCESS

STEP 1: Select the starting point in your garden and insert the first anchor into the soil, measure 1.2m (for the width of your tunnel) and insert the second anchor. The hoops are flexible so you can increase/decrease the width of your tunnel if required. We don't recommend going any narrower than 75cm.

STEP 3: Insert your first hoop into the erected anchors, taking care that the hoop does not spring back.

STEP 4: Continue this process to create your tunnel.
