

HIGH TOP ALUMINIUM HOOP TUNNEL KIT (W) 0.8M X (L) 2M

CONTENTS

3	ALUMINIUM HOOPS
1	COVER
12	CROP COVER CLIPS
12	STEEL PEGS

ASSEMBLY PROCESS

STEP1: Select your starting point in your garden and insert the first hoop into the soil. Once inserted space out the next hoop, we recommend spacing around 1 metre apart. Repeat this process until all hoops are completed.

STEP2: To attach the cover, lay over the top of the hoops leaving an equal overhang at both ends. Use the crop cover clips provided to clip onto the fabric

(1 every half a metre) and then insert a steel peg through the eyelet and push into the soil. The crop cover clips allow you to secure the fabric without having to pierce it with a steel peg. We don't provide clips when covering with fleece or polythene because the clips can tear the fabric.

(Please Note: If due heavy forecast of snow please remove netting beforehand).
