

BLACK HOOP TUNNEL (LENGTH) 5.4M

CONTENTS

20	BLACK FLEXIBLE 90CM HOOP - SINGLE
5	BLACK FLEXIBLE HOOP JOINER CROSS
2	BLACK FLEXIBLE HOOP JOINER TEE

ASSEMBLY PROCESS

STEP 1 : Select the starting point in your garden and insert the first anchors into the soil, measure 1.2m (for the width of your tunnel) and insert the second anchor.

STEP 3 : Insert your first hoop into the erected anchors, taking care that the hoop does not spring back.

STEP 4 : Continue this process to create your tunnel.

STEP 5 : When all the hoops are erected, lay you netting over the top, securing with the clips. Use two steel pegs at each end of the tunnel to finish securing the netting.

We have been generous with the fabric width allowing you to bury the sides or use stones if necessary.
