

Nematode easy Applicator

These instructions will guide you through the application of your Gardening Naturally and Nemasys nematodes using our easy applicator.

You will need the following:

- 1x Bucket or bowl 1 litre or larger
- 1x Funnel or jug
- 1x Stirrer or stick/spoon
- 1x Garden hose with female hose attachment

Product Information:

- Use nematodes immediately after opening the sachet. Once mixed into a solution this has to be used within 4 hours.
- Nematodes are UV sensitive, so apply in the evening when overcast or during rainfall.
- If you are applying over plants rewater 30 minutes after application to wash nematodes back into the soil.
- For all applications to lawns ensure the soil/lawn is kept moist with regular watering for up to 2 weeks.
- Flea Beetle and Box Tree require a second treatment a week after your initial application.

Instructions:

- Empty a litre of water into a bucket and mix in the nematodes thoroughly to make your stock solution.
- Empty the correct amount of stock solution into the applicator pouch by using a funnel or jug. Please refer to (Fig.1) on the next page.
- Top up the pouch with luke warm water.
- Attach the spray head with tube to the pouch.
- Shake to fully mix the water and nematode solution.
- Attach the hose to the sprayer head and turn on the water.
- The spray head can be adjusted using the tab on the side of the head to adjust the flow of water. We recommend the tab be turned to 90° to allow the hole to be fully opened. Depending on water pressure the pouch will take approximately 3-4m minutes to empty.
- Apply the solution as evenly as possible concentrating on any obvious affected areas.
- Once the pouch is empty repeat the process until the stock solution is finished. See the number of pouch refills (Fig.1). Water thoroughly after application.

Fig.1

Pest Type	Coverage sqm	Stock Solution Per Pouch Application	Number of Pouch Refills
Slug	40	333ml	3
Slug	100	200ml	5
Vine Weevil	12	500ml	2
Vine Weevil	100	200ml	5
Ant	16 Nests	333ml	3
Ant	50 Nests	200ml	5
Leatherjacket	100	200ml	5
Chafer Grub	100	200ml	5
Sciarid Fly	12	500ml	2
Cutworm	60	500ml	2
Carrot Root Fly	60	500ml	2
Fruit & Veg	60	500ml	2
Codling Moth	16 Trees	500ml	2
Box Tree Caterpillar	60	500ml	2
Wireworm	60	500ml	2
Flea & Flea Beetle	50	500ml	2
